

COME CAPIRE I GATTI

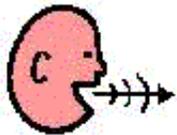

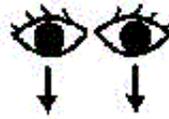

E' facile

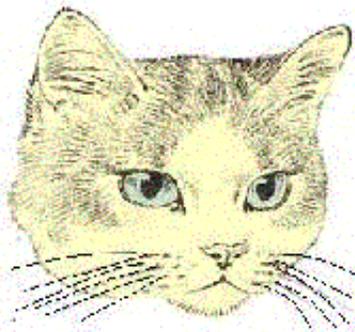

capire

un gatto, se lo guardi attentamente.

I gatti comunicano con il loro corpo, e i loro miagolii.

Un gatto

contento

ha le orecchie

dritte

e i baffi

rilassati.

Se è arrabbiato,

spinge

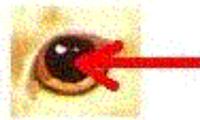

indietro,

le orecchie

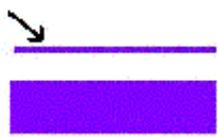

dritte

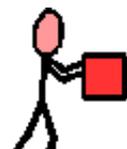

e le pupille

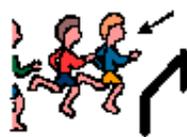

diventano sottili,

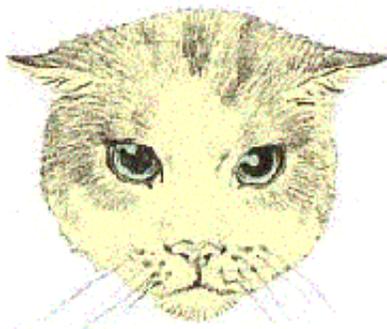

e porta

in avanti

baffi.

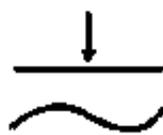

Se spaventato,

ha le orecchie

e i baffi

appiattiti,

le pupille

dilatate.

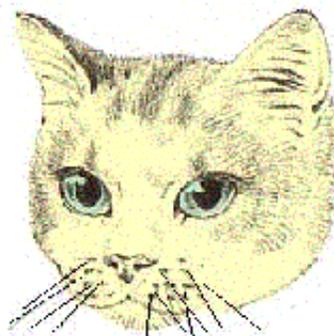

Quando gioca o caccia

dilata

le pupille,

ha le orecchie

dritte

e i baffi in avanti.

1

Un gatto

felice

perchè accarezzato,

socchiude gli occhi

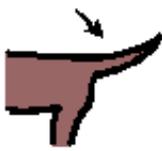

e rilassa

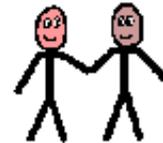

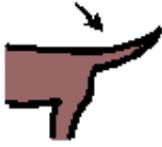

i baffi.

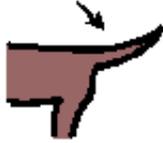

I

Se muove la sua coda da una parte all' altra è nervoso,

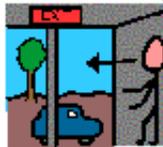

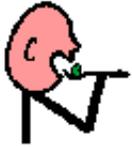

se ha la coda sollevata e ferma saluta amichevolmente,

e se la sua coda è agitata come una frusta è una minaccia d' attacco.

Quando fa le fusa, sta molto bene, quando miagola esprime un bisogno

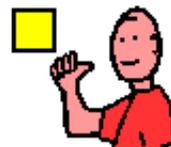

fame,

sete,

o che vuole uscire

di casa.

Questo è il mio gatto,

divertente

vero?
