

PERCHE' SI FORMA L' ARCOBALENO

Tu vedi la luce del sole bianca ,

invece è composta da molti colori.

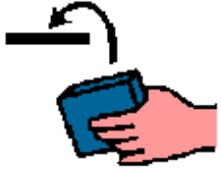

Quando piove e c'è il sole la luce passa attraverso

le gocce di pioggia e si divide formando l' arcobaleno.

COME FARE L' ARCOBALENO

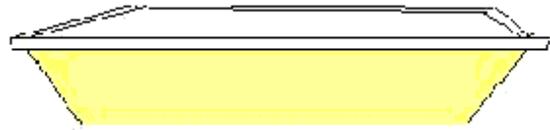

Metti

1

uno

specchio

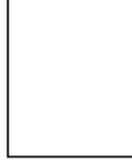

in un catino

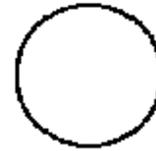

pieno

d' acqua

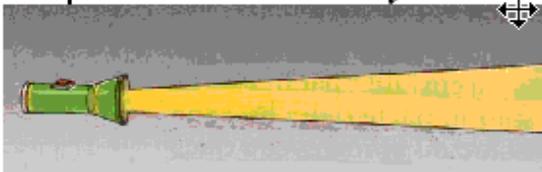

con un cartoncino

bianco

di fronte.

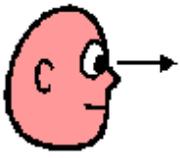

Illumina

lo specchio con una luce molto forte.

Vedrai sul cartoncino l'arcobaleno.
