

Il Passero

Il passero

viene

dall'Europa, il continente

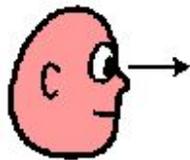

dove abiti

anche tu.

Tutti i giorni

lo vedi

tra le case

e nei giardini.

Il passero

è

lungo

come

la tua

mano,

e pesa

come

i fazzoletti di carta.

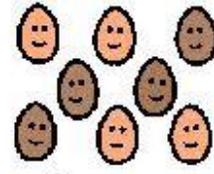

Il passero

ama stare

vicino

agli uomini.

Il passero

papà

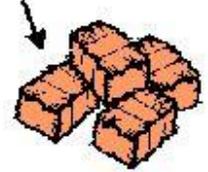

per costruire

il nido

prende

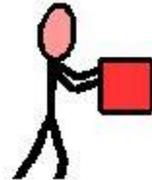

paglia grossa,

erba

e piume;

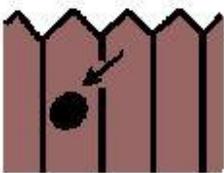

le porta

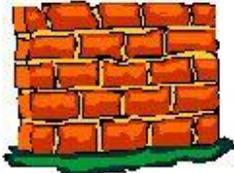

sotto

le tegole del tetto

o nei buchi

dei muri.

La mamma

passero

cova

dentro

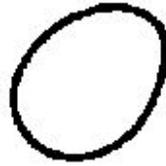

il nido

4

da 4

8

a 8

uova;

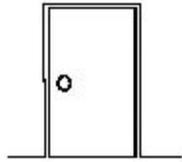

i cuccioli

non hanno

piume

e hanno gli occhi chiusi.

Il passero

ha molti

amici

e non

ha paura

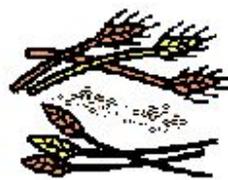

dell'uomo;

mangia

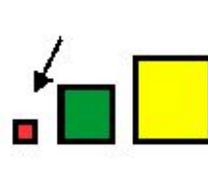

semini,

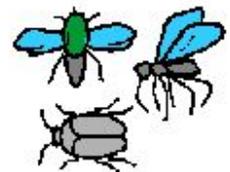

chicchi,

briciole

e piccoli

insetti.
