

## Le pulizie di Primavera

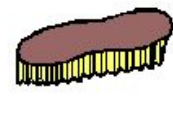

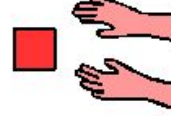

L'Inverno è finito e il sole della Primavera inizia a riscaldarci .

La luce del sole , però , ci fa vedere dentro casa ragnatele ,

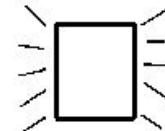

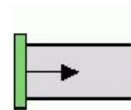

polvere e sporcizia che non abbiamo visto in Inverno .

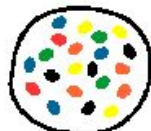

È il momento di aprire le finestre e prendere spazzole ,

scopa e paletta , stracci e secchi ,

piumini per spolverare e cominciare le pulizie di Primavera .

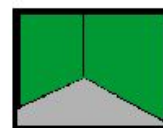

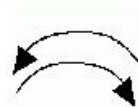

La mamma deve pulire bene tutta la casa , così tu

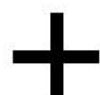

e i tuoi familiari non siete costretti a respirare polvere

e a vivere in mezzo ai germi .

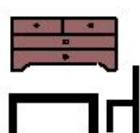

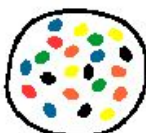

La mamma apre le finestre per cambiare aria nelle stanze

e lava i vetri ; mette le sedie sul tavolo

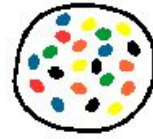

per pulire bene il pavimento, sbatte i tappeti ,

spolvera tutti i mobili .

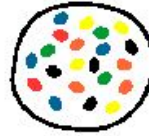

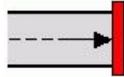

+

Con spugne , stracci e detersivi pulisce tutto .

,

C'è tanto disordine, ma alla fine tutto brilla

+

ed è pulito .

+

La mamma è proprio brava e si merita un grosso bacio.
